PROFESSIONAL SUMMARY

Data & Analytics Professional with 3+ years of experience at JPMorgan Chase delivering automated Looker/Tableau dashboards, ad-hoc deep dives, and self-service data tools. Expert in complex SQL, Python, Snowflake, dbt, and leveraging GenAI tools (Claude Code, Cursor, Copilot) to accelerate analytics workflows.

EDUCATION

M.S., Business Analytics — Northeastern University, Boston, MA *May 2022 | GPA: 3.9/4.0*
Director of Content, NEU Sharpe (Graduate FinTech Society) | NU GSG Senator

B.S., Business Administration (Marketing & Supply Chain) — Northeastern University, Boston, MA *May 2020 | GPA: 3.3/4.0*
Minor: Business Analytics | Study Abroad: London School of Economics, July 2018

PROFESSIONAL EXPERIENCE

JPMorgan Chase, Columbus, OH | *Business Analytics Associate II – Operations Analytics & BI Reporting* *June 2024 – Present*

- Led end-to-end automation of critical ad-hoc reporting, canned datasets, and regular report info pipelines using SQL, SAS, and Python, reducing manual processing by 20% while establishing self-service tools
- Developed executive dashboards and interactive reports tracking operational KPIs and process health using Power BI, Tableau, and Excel, translating complex data into clear, actionable visual narratives for senior leaders
- Performed complex SQL analyses using CTEs, window functions, and multi-table joins across large-scale Snowflake data warehousing environments to identify operational inefficiencies and driver-based performance trends
- Partnered with Product, Risk, Operations, and Technology leaders to translate business requests into technical specifications (BRD/FRD) and program report forms/formats with minimal direction
- Partnered directly with Operations, Product, and Finance stakeholders to translate complex business questions into analytical specifications (BRD/FRD), self-service Looker tools, and decision-ready executive reporting
- Developed interactive dashboards and information portals tracking operational health and customer support metrics, programming and maintaining report forms and formats for cross-functional stakeholders

JPMorgan Chase, Columbus, OH | *Quant Analytics Associate – POS Credit Card Fraud Strategy & Telemetry Analytics* *September 2022 – June 2024*

- Delivered weekly and monthly executive performance reporting analyzing portfolio trends, loss drivers, financial exposure, and forecast impacts exceeding $100K to support business decisions
- Built automated data and reporting workflows using SQL, SAS, Teradata, Python, and Excel to analyze large-scale transactional datasets, improve reporting accuracy, and accelerate recurring performance analysis
- Performed ad-hoc deep dives and root-cause analyses using complex SQL to identify emerging transaction patterns, anomalies, performance drivers, and opportunities to reduce financial exposure
- Developed scenario and financial analyses to quantify business impact, evaluate risk exposure, test strategic assumptions, and support data-driven resource and strategy decisions
- Designed executive Tableau dashboards and self-service reporting views tracking KPIs, portfolio health, loss trends, profitability drivers, and operational performance
- Performed rigorous data validation, reconciliation, variance, and trend analysis across portfolio datasets to ensure reliable reporting and identify drivers affecting revenue, costs, losses, and operational efficiency
- Partnered cross-functionally with Product, Finance, Risk, Operations, and Technology teams to evaluate initiatives, refine analytical assumptions, and implement data-driven process and strategy improvements

Digital Financial Exchange (DIFX), Dubai, UAE (Remote) | *Marketing Analyst - Cryptocurrency* *July 2021 – August 2022*

- Built operational and performance dashboards in Python and Excel tracking customer activity, transaction volumes, and monetization trends, supporting business planning and prioritization
- Analyzed customer metrics, platform behavior, and operational KPIs to provide leadership with quantitative insights supporting strategic platform decisions and roadmap planning

Elysian Jewels, Dubai, UAE | *Founder & P&L Owner* *January 2021 – August 2022*

- Launched and scaled an e-commerce business, driving 20% quarterly growth while managing operations, budget forecasting, P&L performance, and customer behavior analytics to inform growth and platform decisions

AI & DATA SOLUTIONS PROJECTS

Supply Chain Risk Intelligence Dashboard | *React, TypeScript, SQL, Google AI Studio, Python* | Link

- Built an end-to-end analytics platform using 500K+ ERP records, developing scalable SQL analytics (joins, CTEs, window functions) to support demand forecasting, supplier performance tracking, and automated financial KPI reporting

FridgeChef AI | *Gemini Vision API, TypeScript, React, Google AI Studio, Multimodal AI* | Link

- Developed a multimodal AI web app analyzing fridge images to identify ingredients and generate recipes with dietary filters and health scores

HealthCompete AI | *Gemini API, TypeScript, React, Google AI Studio, NLP, Prompt Engineering*

- Built an AI-powered NLP platform to analyze insurance documents, compare coverage, and generate estimates with up to $70/year savings

TECHNICAL SKILLS

Analytics & BI: Looker, Tableau, Power BI, Advanced Excel (formulas, pivots, charts, graphs), MS Access, Microsoft Visio (Process/Data Mapping)
Data & Programming: SQL (CTEs, Window Functions, Joins), Python (Pandas, PySpark, NumPy), Snowflake, Teradata, SAS
AI & Development: Claude, Cursor, GitHub Copilot, Gemini API, Prompt Engineering, React, TypeScript
Analytics & Strategy: Ad-Hoc Analysis, Data Quality & Validation, KPI Reporting, Root-Cause Analysis, Financial Modeling
Tools & Certifications: JIRA, Confluence, GitHub | Tableau, Databricks, Alteryx, SAP ERP, Data Analyst Associate
